DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The disclosure is unclear in setting forth how many embodiments are contemplated by the applicant, as various embodiments with different combination are disclosed. As best understood by the examiner, the following election requirement is formulated.

Specie I	figure 1A-1C.
Specie II	figure 3A.
Specie III	figure 3B.
Specie IV	figure 4A-4B.
Specie V	figure 5.
Specie VI	figure 6A-6B, 7A.
Specie VII	figure 6A-6B, 7B.
Specie VIII	figure 6A-6B, 8A.
Specie IX	figure 6A-6B, 8B.
Specie X	figure 6A-6B, 9A.
Specie XI	figure 6A-6B, 9B.

Specie XII	figure 6A, 10.
Specie XIII	figure 11.
Specie IX	figure 12.
Specie XV	figure 13.
Specie XVI	figure 14.
Specie XVII	figure 15

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The following claim(s) are generic: claim 15 appears generic.
3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each of the species

Art Unit: 2841

has different special technical features, such as, for specie I, a special technical feature include a convex leg, whereas for specie II, the special technical feature include case (16), or for specie III, the special technical feature include resin layer (17), as shown by respective figures, etc. The detail for all the species not identified for the sake of brevity.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
